CENTRE

2018 Wages and Working Conditions Survey: Vancouver Centre-Based Child Care Programs

Westcoast Child Care Resource Centre is pleased to announce that with funding from the City of Vancouver we are conducting a survey of wages and working conditions specifically for those working in centre-based child care facilities in the City of Vancouver.

This survey is intended for full-time and regular part-time employees of licensed centre-based child care programs in the City of Vancouver (i.e., Assistants, Educators, Supervisors, Managers).

This survey is **NOT** meant for those who:

- ▶ work as a casual or substitute employee, or
- ▶ are in a support role in the organization (e.g., cook, accountant), or
- ▶ do not work in a licensed centre-based program in the City of Vancouver.

Confidentiality

The information that you provide will remain **completely anonymous** and will only be available to the project researchers. Your information will only be used to group results across different program types and job roles. No individuals or child care centres will ever be identified.

Starting the Survey

You can start the survey by following this link:

<https://www.surveymonkey.com/r/van-ccwages>
or by scanning the QR code below. You can do the survey on any device (computer, tablet, smart phone).

Thank You in Advance

Thank you for taking the time to participate in the survey. Please complete it by April 30th, 2018. If you have any questions or concerns, please email vanchildcarewages@gmail.com

IMPORTANT:

In the next few weeks, you may also receive a survey as part of phase 1 of the BC Childcare Sector Labour Market Partnership Project. This project, managed by the Early Childhood Educators of British Columbia (ECEBC) with funding from the Ministry of Advanced Education, Skills and Training through the Canada-British Columbia Labour Market Development Agreement is working to build a shared understanding of the sector labour market issues.

Please complete both our Westcoast wages and working conditions survey, as well as the ECEBC survey when it is launched – both will provide critical information for building a better child care system in BC.
