

## Something New from

## Westcoast Curriculum Room

### The Westcoast Creative Centre 2012

The Westcoast Creative Centre is a place to discover and explore natural materials in depth and an opportunity to bring the experience back to children in your centre. Each Creative Centre consists of three sessions during which we will explore a specific material and investigate ways to set it up in the children's learning environment. We will then plan and implement a variety of hands on projects and reflect on our process through documentation.

### All About Wire

- What is wire?
- What does it do?
- How do children explore wire?
- What questions do we have during our explorations?

These are some of the initial questions that we will explore during our first session. During the time between the first two sessions, participants will have the opportunity to take wire back to their centers and set up the initial exploration. Our second session will be dedicated to participant's reflections on children's experiences and a chance to discuss possible extensions and in depth investigations. As we go into the third session we will revisit our questions and by using children's theories and our discoveries we will create documentation.

Thursdays from 7:00 pm – 9:00 pm      April 19, 2012  
May 3, 2012  
May 17, 2012

***Participants must register and attend all three sessions.  
Registration begins on Wednesday March 7, 2012.***
